

Press Release

Christmas Donation for Children Suffering from Cancer in Support of the Parents Initiative Intern 3

Unterhaching, December 2009. This year, instead of buying costly personal gifts for customers, ITD GmbH will again support the "Parents Initiative Intern 3" of the Dr. von Haunerschen Children's Hospital at the University of Munich with a generous donation. "Especially at the end of the year we would like to give people in need some hope for the new year," emphasized Wolfgang Eder, Manager at ITD GmbH.

"Parents Initiative Intern 3" – Support for Children Suffering from Cancer and their Parents

Established in 1985, the "Parents Initiative Intern 3" has now been in existence for nearly 25 years and acts as a voluntary, charitable association of the Children's Cancer Ward Intern 3 at the Dr. von Haunerschen Children's Hospital in Munich. The parents of children suffering from cancer have organized themselves in this association to improve the conditions in the Department of Hematology and Oncology at the University Children's Hospital in cooperation with the doctors, nurses and supporting personnel. This way, children suffering from cancer and their parents are offered assistance with medical, nursing, psychological and social issues during the illness.

Targeted and Efficient Use of the Donations

Thanks to the donations, urgently needed facilities can be purchased, optimal treatments conducted and bottleneck situations with regard to the treatment and caring of the children prevented, and lots more. In addition, parents who find themselves in financial difficulties because of the illness of their child are supported by a social fund, and in future it is also intended to provide aftercare service for former patients, their families and bereaved parents.

The social institution for the support of children suffering from cancer is however reliant on further financial contributions. More information regarding further support programs is available at www.eltern-intern3.de.
