

## modul-port

Strong on the ground,  
flexible in application

Through its various attachment and application options, its flexible system structure, its various sizes and variability, the stationary carrier system **modul-port** provides a suitable solution for all needs.

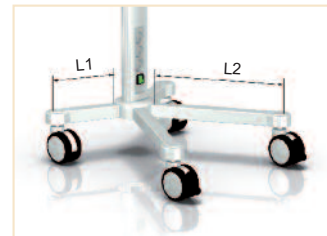

Multiple expansion options ensure fast adaptation to new market requirements and thus, safeguard for the future.

## uni-cart

The right choice for a small  
footprint

**uni-cart** is great in tight spaces and under difficult conditions. Its variable cantilevers ensure superior stability. Smaller instruments can be easily placed. The support column allows covered cable management, including socket strip.

## pro-cart

A tough model to match all  
scenarios

Due to the use of its entire depth, **pro-cart** can also seamlessly integrate larger devices. The cover with soft rubber lips and locking mechanism provides access to unique cable management and at the same time both safety and ease of cleaning (hygiene).

## classic-cart

The universal solution for all  
applications

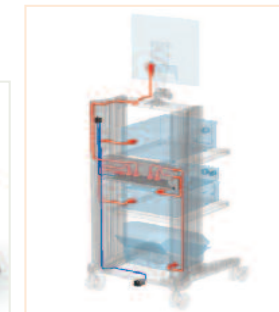

**classic-cart** is the universal carrier system for a wide variety of medical technical equipment. Its versatility with respect to height and width offers maximum flexibility and provides a variety of configurations for all areas of medicine

## compact-cart

The compact cart for special  
missions

With a maximum payload of up to 180 kg / 396 lbs, **compact-cart** means outstanding protecting from toppling over. Its compact design provides plenty of functional area both in the low-cost "Economy" as well as in the enhanced "Profi" version. Its particular electrification concept ensures safety and order.

## Accessories

Lots of extras for routine  
applications

All system components and accessories were specifically developed for medical use and fulfil the specific needs in this area. General compatibility and modularity of all mobile equipment carts and stationary carrier systems pro-

vides for each carrier system to be fitted individually.

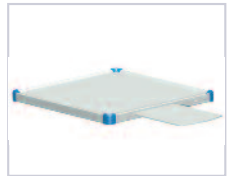

Moreover, the ITD program is so comprehensive that almost any desired configuration is already included in the standard version:

### System components

With a wide selection, including shelves, drawers, isolation transformers, keyboards, or supporting arms ITD GmbH offers the best placement and mounting options for the integration of all medical equipment.

### Accessories

A comprehensive range of accessories - in addition to the system components - completes all individual needs for the equipment carrier. Special mounts, for example, provide for perfect placement of endoscopes, gas cylinders or infusions. Baskets are used to keep smaller items and a variety of socket strips with matching connector locks support necessary and reliable electrification.

## OUR EXPERIENCE – YOUR SUCCESS

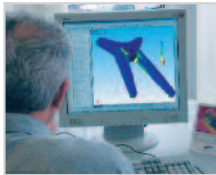

### Modularity – clever and individual

The entire ITD program is modular. Each carrier system may thus be configured for each application in a modular system individually and priced attractively, offering a safeguard for the future.

### Quality – durable and safe

Nowhere is reliability of the technology as important as in medicine. At ITD, high-quality materials ensure durability and reliability. All equipment carriers are subject to Directive 93/42 EEC.

### Service – personal and efficient

Qualified personnel is available for friendly and professional support and realization of individual needs. A distribution network of offices also offers customer-oriented presence.

### Design – concise and modern

The combination of design and functionality moves the devices in the foreground. Moreover, the modern design highlights the significance of the equipment.

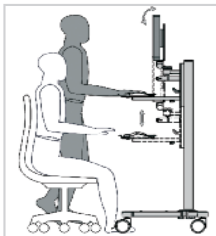

### Customizing – specific and characteristic

Tailored solutions are prepared precisely in accordance with user requirements, regardless of special applications, special equipment or individual corporate design.

### Ergonomics – adaptable and natural

Equipment carriers are adapted to natural movements. Coordinated work surfaces and handle positions ensure a natural posture and maximum comfort.

## ITD IS COMMITTED TO YOU WORLDWIDE

## ITD. WE BEAR RESPONSIBILITY

STATIONARY CARRIER SYSTEMS  
MOBILE EQUIPMENT CARTS

## ITD. SPELLS SUCCESS

Since 1995, ITD has stood for **Innovation, Technology and Design** in the area of stationary and mobile carrier systems for medical technology. ITD sees to it that high quality electrical medical instruments are optimally placed in the instrument cart, and that investments in high-carat technology pay off over the years

Thanks to the competence of ITD employees and their familiarity with the environment in which the product is used, a user-oriented development and construction, and the highly qualified manufacturing work force, ITD creates quality from the start. This makes ITD the market leader not only in Europe. A success story that inspires us to find the best solutions for the daily practice of our customers also in the future.

### We listen to the market.

New diagnostic and therapeutic procedures as well as economic aspects are always new challenges to developments in medical and laboratory technology. ITD has taken up the cause of rapid transformation of these market requirements into meaningful product solutions. But for us, innovation means more than simply responding to new demands. We constantly test and optimize our solutions, scrutinize details and work on new and pioneering ideas. Practical and consistent user-friendly. This is one of our strengths.
