

# ITD INTEGRATION SERVICES

2025

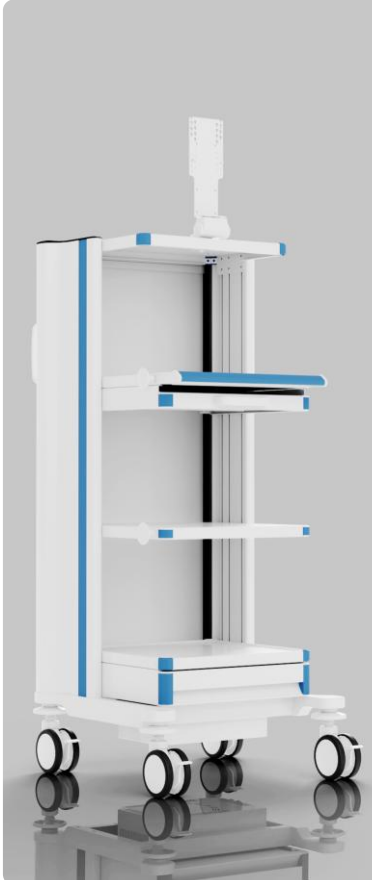

# FROM THE EMPTY EQUIPMENT CART TO THE READY-TO-USE PRODUCT.

On request, we can take over the complete processing of your orders, including warehousing, testing and direct logistics.

## Your effort

- 
- Operational strain for assembly, wiring and testing.
  - Over-extended resources in Purchasing, Production, Quality & Service.
  - Long lead times through additional internal process steps.
  - High storage & handling costs for pre-assembled equipment carts.
  - Increased total cost due to inefficient logistics and rework on site.

### Pre-assembly

#### Services

- Cables & interfaces pre-assembled
- Material Logistics & Quality Assurance

#### Advantages

- Less assembly and testing effort
- Standardized quality, fewer errors, full documentation
- Fewer suppliers, simpler logistics
- Cost advantages due to elimination of storage and individual components

Service Level 1

## Our solutions

### Device Integration & Warehouse Logistics

#### Services

- Devices assembled & wired
- Storage of pre-configured systems

#### Advantages

- Plug-and-play devices from the factory
- No assembly for end-user
- Less effort for service teams
- Shorter delivery times
- Less internal resource commitment

Service Level 2

### System Integration & Direct Distribution

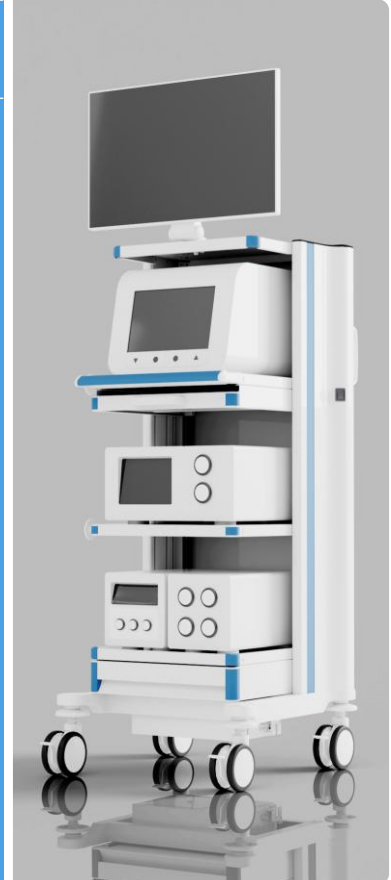

#### Services

- Complete assembly incl. safety test
- Labeling, documentation & direct shipping

#### Advantages

- Fully tested systems
- Immediately ready for use on site
- No additional factory run
- Flexible in the event of fluctuations in demand
- No own storage/assembly capacities required

Service Level 3
